

[Me As Entrepreneur Essay](#)

March 28, 2016

Dear (Name of Admissions Officer),

My name is Ahmed Elshayeb. I am a 23-year-old Egyptian national who currently resides in Turkey. As a child, I lived in Giza and attended the Delta Language School until my graduation in 2009. That same year, I was accepted to study at Ahrum Canadian University where I majored in Software Engineering. I graduated with a Bachelor of Computer Science and Information Technology in 2013 with a 3.21 GPA.

My time at university was characterized by my passion for computer science and a thirst for knowledge. In 2011, from June to August, I gained valuable experience by participating in The Microsoft Citizenship Summer Internship. This project involved support for our NGOs.

In 2012, during the course of my studies, I found time to become an entrepreneur and established the website, [paralyzer.biz](#). This website's purpose was to encrypt executable applications using fully undetectable stubs. At the time, [paralyzer.biz](#) was the only online automated service that could perform this service. I was successfully generating income in excess of \$400 USD daily. Unfortunately, nefarious customers began encrypting malwares using my service and I decided to close my business and deactivate my website.

I considered [paralyzer.biz](#) a learning experience and continued on my path as an entrepreneur. I have a strong interest in crypto-currencies, such as Bitcoin (BTC). In 2013, I developed a bot that could predict the upcoming price of a specific crypto-currency. Its algorithms were based on news, market depth, and supply and demand. A \$1,000 USD investment made in February 2013 netted me \$20,000 USD by May 2013.

My graduation project at Ahrum Canadian University was a mobile SOS tracking system called iHelp. This windows phone application provides time tracking and messaging features using GPS and Cloud mobile services. These features deter kidnapping and similar threats. The tools I used were C#, Viso, and Windows phone 8.1 toolkit. My final grade for this project was "A".

Following my graduation from Ahrum Canadian University, I moved to Turkey and started [Aradok.com](#), an online scheduling service that books appointments online by earliest availability. This project is currently in the funding stage of development.

I created an online gambling bot that uses a martingale algorithm for websites like [bitzino.com](#). Another bot I created could solve Google (reCAPTCHA API version 2.0) CAPTCHAs using [antigate API](#). I have experience in Web Application Security, scanning websites for web vulnerabilities (Sql injections and XSS) and reporting them to website administrators. A record of the exploitable

[Me As Entrepreneur Essay](#)

Well, if you will care to ask successful business people and entrepreneurs, they will surely tell you different ... Trust me, I am throwing no hyperboles out here.. The examples my parent role models gave me resulted in my ability to go through walls to reach my goals and a tendency to put myself in sticky situations knowing This tip is less abstract than you might think, so bear with me.
